3

In the account window, under “Sustainable Travel CLUB” click the button “Become a member of the CLUB”

4

We confirm that we have familiarized and agree with the rules of the Sustainable Travel CLUB. Since we care that only relevant information reaches you, you have the option to mark where you usually travel on LINK or click the “Register” button

5

After registration, you get to the main page of the “Sustainable Travel CLUB”

The screenshot shows the user interface for the Sustainable Travel CLUB. At the top, there is a navigation bar with the LTG LINK logo, links for 'Book & Manage', 'Information & Services', 'LTG Link Business', and 'About Us', along with language and user options. The main content area is titled 'Sustainable Travel CLUB' and includes an identification number. A summary section displays four key metrics: 0 km Travelled, 0 kg CO2 saved, 0 Active points, and a Voucher balance of €20.43. Below this, a welcome message and several paragraphs of text promote sustainable travel, highlighting the benefits of electric trains and the club's mission. The LTG LINK logo is repeated at the bottom, along with a source citation and a legend for 'Valid' and 'Used and expired'.

**Welcome to the LTG Link Sustainable Travel CLUB!**

After all, you know how much we love trains – one of the most sustainable and least CO2 emitting means of motor transport! The aid of trains to nature compared to a car is obvious! Less CO2, less distress!

Did you know that compared to cars, trains emit -77% less CO2!\*

In fact, our electric trains have zero CO2 emissions – they are powered by electricity produced from renewable energy sources! The electricity generated does not disappear anywhere even during braking. It is used for the needs of the train – lighting, heating, etc.

And what's more, some routes will have battery powered trains in the future! That's right! The battery will be charged while running the electrified section, and upon the termination of the contact network, the train will continue to run with the help of the battery!

You see, trains know how to protect nature! Therefore, we constantly encourage you to choose more sustainable train trips!

So, travel TOGETHER, reduce CO2, change your car to a train, and for the saved CO2 collect points that you will be able to exchange for a discount for train travel!

So once again, traveller, welcome to the Sustainable Travel CLUB! Now take a moment to look around with an eye bLINK and we wish you a pleasant trip!

Why drive if you can travel!
